Ginny,
None of the provisional cases have CRF's, so
I could only compare (1) with (2).

Policy intelligenetics comparison of Sequences have being a comparison of Sequences have being exact being occupant on the 7 Nov 107 14(3):34-951.

Results file us-09-310-186-2-1-se made by beingest on the 7 Nov 107 14(3):34-951.

Number of second above cutoff:

Number of second above
```

The scores below are sorted by initial score.
Significance is calculated based on initial score.
A 100% identical sequence to the query sequence was not found.

The list of best scores is:

STR scores balow are sorted by initial score.
Significance is coloulated based on initial score.

A 100% identical sequence to the query sequence was not found.

Results of the initial comparison of US-09-910-186A-11- (1-1374) with: complement Query sequence being compared:US-09-910-186A-11' (1-1374) Mumber of sequences searched: 3 Number of scores above cutoff: 3

Standard Deviation Total Elapsed 00:00:00.00 SEARCH STATISTICS Median 4027 OD:00:00 Number of residues: Number of sequences searched: Number of scores above cutoff: Times:

The scores below are sorted by initial score. Significance is calculated based on initial score.

A 100% identical sequence to the query sequence was not found.

The list of best scores is:

1704 00:00:00:00 Number of residues: Number of sequences searched: Number of scores above cutoff: Times:

Total Flapsed 00:00:00.00

The scores below are sorted by initial score. Significance is calculated based on initial score.

A 100% identical sequence to the query sequence was not found.

The list of best scores is:

The scores below are sorted by initial score. Significance is calculated based on initial score.

A 100% identical sequence to the query sequence was not found.

The list of best scores is:

The scores below are sorted by initial score. Significance is calculated based on initial score.

33

Number of residues: Number of sequences searched: Number of scores above cutoff:

A 100% identical sequence to the query sequence was not found.
